-----

*You are at the door on this wall or at the mouth of your driveway facing into the land. Stand with this dotted line against your belly and project the tic-tac-toe grid all the way back and from left to right.*

## 5 Very Important Notes:

1) Always align the bagua with the wall containing the front door or the mouth of the driveway, **even if this entrance is never used.** 2) For rooms with more than one door, use the door closest to and/or in the most direct line with the front entrance. 3) Multiple stories stack like a cake, then turn as you enter in an overlay. 4) Anything connected to the property by roof, foundation or road is included in boundaries of the bagua. 5) Projections can cause missing or enhanced guas, depending upon whether they are missing by over half the width or length of the property. See schematics to the right. Measure if necessary! >>>>>
